

3-Minute Intro Video Script

The talking-to-camera script for your course sales page and Meta ad.

Length: about 3 minutes (~500 words) | Delivery: straight to camera, warm and confident | Burn in captions

0:00-0:15

Hook

“If you have been hearing about AI video and how people are quietly making money with it, but you still don't know how to actually turn it into income, watch this to the end. Because in the next three minutes, I am going to show you exactly how.”

ON SCREEN: “How to get paid with AI video” • B-ROLL: quick screen recording of an AI video generating.

0:15-0:38

The Problem

“Here is the truth nobody tells you. Learning how to use AI tools is the easy part. Thousands of people are already doing that. But knowing how to package that skill and get foreign clients to pay you five hundred to two thousand dollars? That is the part almost nobody teaches. And that is exactly the gap this course closes.”

ON SCREEN: “\$500 to \$2,000 per client”

0:38-0:58

Who You Are

“My name is Okoye Chukwuemeka. I create AI videos for clients around the world, and I have helped my students land their first jobs, reach Top Rated on Upwork, and cross one thousand, five thousand, even ten thousand dollars in earnings. I don't just teach this. I do it every day. And now I am handing you the exact system.”

B-ROLL: your Upwork profile, a finished AI video you made.

0:58-1:42

What You Get: The Skill + The Models

“So here is what you are getting inside. First, the skill. I show you how to create professional, cinematic AI videos and high converting ad creatives using the exact models and tools I use every day, Higgsfield Cinema Studio and Marketing Studio. You will be able to turn a simple idea into a video a business will happily pay for, even if you are starting from complete scratch. No camera. No expensive software.”

“Second, and this is the part that actually puts money in your pocket, the client system. I walk you through finding high paying foreign clients using Apollo and LinkedIn, selling your services on Contra and Fiverr, and optimizing your Upwork profile and proposals so clients invite you, instead of you chasing them.”

B-ROLL: Higgsfield interface, an AI video result, then Upwork and Contra job invites.

1:42-2:05

The Private Telegram Community

“And you are not doing this alone. When you join, you get access to our private Telegram community. This is where I drop updates, answer your questions, share new tools and client opportunities, and where students celebrate their wins together. Think of it as having a mentor, plus a room full of people all pushing in the same direction.”

ON SCREEN: “Private Telegram Community included” • B-ROLL: Telegram chat with student wins.

2:05-2:38

Proof

Slow down here. Let the numbers breathe.

“And this is not theory. My students are already getting paid. One got two orders in less than twenty four hours on Fiverr. Another crossed five thousand dollars on Upwork. Others are landing AI video jobs at forty five dollars an hour, and offers of four to five thousand dollars a month. Real people. Real results. Using this exact system.”

B-ROLL: flash the real screenshots (Fiverr orders, \$5K profile, \$45/hr jobs).

2:38-2:55

The Offer

“You are getting all of this. The full training, the models, the complete client system, and the private community, for one single payment. One client project alone can pay you back many times what this course costs. That is how good the return is.”

ON SCREEN: “Lifetime access • ₦30,000”

2:55-3:10

Call to Action

“So here is your decision. Thousands of people will learn AI this year. The ones who know how to sell their skills are the ones who get paid. Which one will you be? Click the button below, get instant access, and let me show you how to build a skill the whole world is paying for. I will see you inside.”

ON SCREEN: “Enroll now” with the button. End on your course thumbnail.

Recording tips

- Record in a quiet, well lit spot. Face a window if you can.
- Keep your energy up. Speak like you are talking to one friend, not a crowd.
- If you fumble a line, pause and say it again. You will cut it later.
- Film the B-roll (screen recordings, the Telegram group, the result screenshots) separately, then lay it over your voice.
- Keep the first 5 seconds punchy. That is what decides if people keep watching.
- Post the final video at the very top of the sales page, right under the hook.
